

Volcano Vocabulary

Create flashcards for the following volcano vocabulary terms below. If you are using standard 3" x 5" index cards, cut them in half first to avoid wasting paper. Do not lose your flashcards, you will need them to review for the quiz and final, and you will need to turn them in with your class notebook on Friday, March 20.

Create one card with your full name on it (first & last), plus class and period. You will need something to keep your cards in, perhaps an envelope or even just a rubber band. Each card should have the vocab term on the front, and a definition on the back. You must write clearly and legibly, if I cannot read your cards when you turn them in, you will earn an "F" for the assignment. You may type your words and definitions, then print them out and paste them onto cards if you want.

For vocab pairs (like "magma vs lava"), you must highlight the difference between the matched words.

Vocabulary Terms:

- Volcano
- Ring of Fire
- Hot spot
- Viscosity
- Magma chamber
- Pyroclastic flow
- Lahar
- Geothermal activity
- Magma vs Lava
- Pahoehoe vs Aa
- Crater vs Caldera
- Dormant vs Extinct vs Active Volcanoes
- Shield vs Cinder vs Composite Volcanoes
